SAC Swiss Aviation Consultants and Grossmann Jet Service announce the successful launch of the new Hawker 900XP operation

Holzhäusern/Zug, Switzerland, March 13th. 2008 – SAC Swiss Aviation Consultants (Zug, Switzerland) and Grossmann Jet Service (Prague, Czech Republic) are proud to announce the introduction of a factory new Hawker 900XP into the operation of Grossmann Jet Service.

The H900XP was registered by the Czech Authorities in February and will now be available to charter customers. It is the first Hawker ever to be registered in the Czech Republic.

The addition of the H900XP to Grossmann Jet Service's fleet is another milestone in their corporate history. It represents a major increase of their business volume and an ideal complement for their already operational Embraer Legacy. Grossmann Jet Service has been chosen for the operation of the H900XP because of its high quality services and its responsive organisation.

The acquisition process of the Hawker 900XP has been successfully guided and supervised by SAC SWISS AVIATION CONSULTANTS LLC. "It was certainly a challenge, as the H900XP was not yet EASA type certified at the order date," says Dr. Daniel Lütolf, SAC Swiss Aviation Consultant's Managing Partner. The EASA Type Certificate was finally issued on November 16th. 2007.
